SQL

Having Clause

Having clause

We cannot use where Keyword with aggregate functions.

```
SELECT    column_names
FROM      table_name
WHERE     condition
GROUP BY  column_name
HAVING    condition
ORDER BY  column_names;
```

Find the total salary spend department wise where total salary of department is greater than 60,000.

Employee (empid, name, age, salary, department)

Aggregated column

contained in Group By

```
SELECT sum(salary), department FROM Employee
GROUP BY department HAVING sum(salary)>60000;
```

SELECT list can contain only aggregated columns or/and column contained in GROUPBY Clause.
